-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The Information Disclosure Statement filed April 18, 2005 has been reviewed by the Examiner. The prior art references of DCF Hickman Ltd. (WO96/22821) and Shepherd et al (WO 02/*085478) have not been considered since copies of the references have not been included with the application.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7, 8, 25 and 26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 recites the track "positioned inside a valley or natural feature." Valleys and "natural features" cannot be claimed as they occur naturally in the environment and do not further limit the claim. This leaves the claim vague and indefinite.

Claim 8 recites the track "positioned down the side of a hill or sloping surface." Hills and sloping surfaces cannot be claimed as they occur naturally in the environment and do not further limit the claim. This leaves the claim vague and indefinite.

Claim 25 recites the track "positioned inside a valley or natural feature." Valleys and "natural features" cannot be claimed as they occur naturally in the environment and do not further limit the claim. This leaves the claim vague and indefinite.

Claim 26 recites the track "positioned down the side of a hill or sloping surface." Hills and sloping surfaces cannot be claimed as they occur naturally in the environment and do not further limit the claim. This leaves the claim vague and indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Schwarzkopf (US 4,165,695).

Schwarzkopf discloses an amusement ride comprised of a non-continuous track shown in figure 1 having a lower center portion two higher ends and a twisting barrel roll assembly positioned between the lower center portion and a higher end portion. A vehicle is positioned to move along the various track sections along rails. The vehicle is propelled by a cable drive located at the lower center portion and anchored below the right higher end portion as shown in figure 1. A motor operates the cable propulsion at various speeds through a clutch. The system is further comprised of a brake system mounted with the motor and clutch to slow and stop the cable and therefore control the speed and movement of the vehicle. The motor, clutch and brake systems are shown in figure 6 to be connected with the cable drive.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ishikawa et al (US 5,853,331), Houben (US 6,348,004) and Clerx et al (US 6,405,655) all disclose various types of amusement rides.
